

Perpetual Investment Funds

PERPETUAL SHARE-PLUS LONG-SHORT FUND

December 2024

FUND FACTS

Investment objective: Aims to provide long-term capital growth and income through investment in quality shares and taking short positions predominantly in selected Australian shares.

FUND BENEFITS

Offers broad market exposure with the potential for higher returns through the use of shorting (taking short positions) within a risk-controlled environment, and actively managed by one of Australia's most experienced investment management teams.

FUND RISKS

All investments carry risk and different strategies may carry different levels of risk. The relevant product disclosure statement or offer document for a fund should be considered before deciding whether to acquire or hold units in that fund. Your financial adviser can assist you in determining whether a fund is suited to your financial needs.

Benchmark:	S&P/ASX 300 Accum. Index
Inception Date:	March 2003
Size of Portfolio:	\$900.39 million as at 30 Sep 2024
APIR:	PER0072AU
Management Fee:	0.99%*
Performance Fee:	13.98% of outperformance*
Investment style:	Active, fundamental, bottom-up, value
Suggested minimum investment period:	Five years or longer

MARKET COMMENTARY

Markets sold off in December after their strong bounce in November. The S&P/ASX300 Accumulation Index gave up -0.81% with Materials down a significant -11.75% while Real Estate, Energy and Consumer Staples all gave up over 5%. Euphoria over hoped-for tax cuts and de-regulation from the incoming Trump administration were tempered by the growing reality of governing with a narrow Republican majority in the House of Representatives. Squabbling over spending measures nearly forced the US federal government into shutdown before Christmas. Combined with resurgent economic confidence this led to US bond yields rising, with the yield on the US 10 year threatening to rise above the 4.7% peaks in April. The Australian economy sent mixed signals. Employment growth remained robust, at 35,600 in November, pushing the unemployment rate down to 3.9%, but most jobs were being created by government as public spending continued to grow. Meanwhile GDP slowed to just 0.8% for the year ended Q3 with just 0.3% for the quarter. GDP per capita fell -0.3% the seventh consecutive quarterly decline.

PORTFOLIO COMMENTARY

The portfolio's largest overweight positions include Flutter Entertainment Plc, Suncorp Group Limited and Cobram Estate Olives Ltd. Conversely, the portfolio's largest underweight positions include Commonwealth Bank of Australia, CSL Limited and Brambles Limited.

The overweight to Sigma Healthcare contributed to performance as it was one of the strongest performing stocks in the market during the quarter (+82.46%) after the ACCC announced it did not oppose the Sigma Healthcare Limited and CW Group Holdings Limited merger creating a new listed retail giant. The acquisition creates a larger high-quality company which operates in a favourable oligopolistic wholesale market and has an industry leading distribution network. We believe that the quality of the combined business will improve as the group moves to become an integrated wholesaler as well as a pharmacy franchisor with dominant market share and a pipeline of pharmacists to continue to expand their franchise network. We have admired Chemist Warehouse for a long time and believe that it is probably the best franchisor/retailer in Australia. Chemist Warehouse brings with it a high-quality management team to be instilled into the new combined board through founders Mario Verrocchi and Jack Gance as well as further long-term synergies to be realised by the group.

Myer rallied 50.34% during the December quarter as the company continued towards its potential combination with Premier Investments apparel brands Just Jeans, Jay Jays, Portmans, Dotti and Jacqui E. The combination will create a leading omni-channel retail platform that brings enhanced scale and significant operating leverage benefits. Myer will also benefit from the expected addition of Retail Stalwart Solomon Lew's potential addition to the board.

The overweight position in Iluka Resources detracted from performance (-27.55%) over the quarter as the market was broadly underwhelmed by the update from the company on the rare earth refinery with particular concern around potential offtake pricing. Iluka is a major producer of rutile and synthetic rutile that is used to produce pigment (paint) and largest producer of zircon that is used to produce ceramics (tiles) and a recovery in these markets can be met by releasing excess inventory and reducing working capital before production is restarted. Iluka has a very strong balance sheet (net cash) and also owns a valuable stake in Deterra Royalties, which was spun-off in an IPO.

BlueScope Steel Limited detracted from performance (-15.81%) as the steel sector continued to face headwinds and downgrades from the sell-side. While short-term steel spread dynamics remain challenging, we believe the share price movement aligns with the longer-term opportunity. Steel pricing has reached a level where there is an asymmetric upside potential, and we are observing positive competitive trends with hot-rolled coil steel prices increasing. At current levels, the company is an attractive opportunity trading near net tangible asset value. BlueScope remains one of the highest quality steel producers globally, with a capable management team, a significant asset in Port Kembla, and the Colorbond brand, which not only boosts margins but also represents a substantial overseas opportunity.

OUTLOOK

After initially embracing Trumponomics attention is now turning to the challenges of delivery and containing excesses in the economy, including the potential for inflation to return in 2025. The incoming administration will need all its political guile to deliver the much hyped agenda of reduced regulation, tax relief and spending cuts whilst also reducing the budget deficit. Bond vigilantes will no doubt be around to remind markets if they think that this ambitious mix of goals is not being achieved. Whilst bond markets have been wary of the period ahead equity markets in the United States continue to exhibit extreme exuberance and are once again trading at similar valuations to the Dotcom peak in 2000 and the post COVID bubble in 2021. Australian equity valuations, whilst stretched in some sectors, are not as out of kilter overall, especially as resources trade near multi year lows. The big question remains what happens in China where the economy flirts with deflation and whether authorities can pull off a the sustained stimulus that Mario Draghi and Ben Bernanke did in 2012, such as QE3, that allayed market concerns about the commitment to reflating the economy.

The performance fee is equal to 13.98% of daily outperformance over the hurdle rate of return. The current hurdle rate is the S&P/ASX 300 Accumulation Index + 2%pa. Performance fees are accrued daily however will only be paid in the event that the Fund's return over the performance fee calculation period is positive and the performance fee accrual is positive. For further information on the calculation of the performance fee please consult the Fund's PDS.

The Ordinaries benchmark prior to 1/4/2000 was the ASX All Ordinaries Accumulation Index. From 1/4/2000 to current the benchmark is S&P/ASX 300 Accumulation Index.
