MARKET COMMENTARY

During month of November, persistent themes driving market uncertainty such as policy ambiguity, geopolitical and trade tensions, and rapid shifts in economic data continued - with the added wrinkle of a long U. S. government shutdown ending. Despite these headwinds, global equity markets continued to push slightly higher with signs of a rotation in leadership. The MSCI World Index rose 0.3% in November, while the MSCI All Country World Index was essentially flat, marking another month of positive returns for developed markets in aggregate. The S & P 500 performed in line with developed markets other than Japan, as it was down -0.7%, supported by strength in value-oriented sectors in a challenge to the long-lasting growth rally of the past 12 months (which was only briefly interrupted in the first quarter). The same was true in developed markets across the globe, in which value led growth for a second month in a row. For the month, with the MSCI World Value Index up 2.1% versus a decline of -1.3% for the MSCI World Growth Index. This closed the gap for the year as the MSCI World Growth Index is only outperforming its Value counterpart by ~250 basis points. Outside of developed markets, emerging markets underperformed, blunting the momentum of a strong year, with the MSCI Emerging Market Index down -2.4%. After a large relative decline in the first part of the year, the U.S. dollar (USD) has been relatively range bound in total over the past six months.

PORTFOLIO COMMENTARY

In this market environment, the Barrow Hanley Global Share Fund strategy outperformed the MSCI World Index by 1.2% in November as the value style notably outperformed growth.

Merck & Co. positively contributed to relative performance during the month as strong pipeline progress and strategic business development reinforced investor confidence. The company, a global pharmaceutical leader focused on oncology, vaccines, and specialty medicines, announced successful Phase 2 results for its CADENCE trial of Winrevair, which demonstrated meaningful reductions in pulmonary vascular resistance in patients with pulmonary hypertension. This outcome, combined with plans to advance to Phase 3, added to a series of recent R&D wins that have strengthened Merck's growth narrative. Additionally, the announced \$9.2 billion acquisition of Cidara Therapeutics highlighted Merck's proactive approach to offsetting future revenue pressures from Keytruda's loss of exclusivity, while expanding its presence in infectious disease prevention. These developments supported sentiment that Merck is well-positioned for a value recovery amid improving sector dynamics.

Permian Resources Corporation positively contributed to relative performance during the month as strong operational execution and cost discipline drove results ahead of expectations. The company, an independent oil and gas producer focused on the Permian Basin, reported higher production volumes and lower controllable cash costs, which supported robust profitability. Third-quarter earnings and free cash flow exceeded consensus estimates, aided by improved well efficiency and reduced drilling and completion costs. Management raised full-year production guidance and highlighted enhanced marketing agreements that should improve natural gas pricing and future cash flow. Additionally, the balance sheet strengthened with meaningful debt reduction, reinforcing financial flexibility for continued bolt-on acquisitions and shareholder returns.

Entegris, Inc. detracted from relative performance during the month as cautious guidance overshadowed otherwise stable results. The company, a supplier of advanced materials and process solutions for the semiconductor industry, reported revenue and EBITDA growth in line with expectations, but its outlook signaled continued softness in demand recovery. Management emphasized deleveraging efforts following a major acquisition, prioritizing free cash flow over near-term profitability, which led to inventory reductions and underutilized facilities that pressured margins. Additionally, cyclically weak capital expenditure trends in semiconductor fabrication weighed on sales of equipment-related products, even as consumables like slurries and filtration performed well.

BAE Systems plc detracted from relative performance during the month as European defense stocks softened amid speculation about a potential peace deal for Ukraine. The company, a leading global defense contractor with operations spanning air, land, sea, and cyber domains, issued a trading statement confirming guidance and highlighting strong operational performance, but this reassurance was overshadowed by sector-wide sentiment. While order intake remained robust and management reiterated expectations for high single-digit revenue and earnings growth, investor concerns about future demand weighed on shares despite industry commentary suggesting these fears are misplaced. In our meetings with European peers, companies emphasized that current peace discussions are unlikely to alter long-term procurement plans, with German players particularly confident that demand is secure and execution speed is the primary challenge.

OUTLOOK

The fourth quarter appears poised to extend the rally in the markets that began in April, supported by a shifting macroeconomic backdrop and the potential for broader market participation. After years of narrow leadership dominated by mega-cap technology and AI-driven names, cyclical sectors are showing signs of life, creating an interesting juxtaposition to the secular AI-fueled euphoria. While the AI boom seems durable, the significant divergence in performance over recent years suggests room for a relative catch-up trade as expensive AI-exposed companies try to grow into current valuation levels. However, the positive data remains among a smaller group of more affluent consumers, as there is some evidence that the higher and lower ends of the income spectrum are experiencing diverging outcomes. A gradually softening labor market has given the Fed cover to cut rates without stoking inflation fears (although this is unclear given the data outage from the shutdown), setting the stage for a regime not seen in decades - one in which easing monetary policy coincides with modest employment weakness yet sustained economic activity. Lower rates should provide a tailwind for housing and other interest-sensitive areas, while global stimulus measures could reinforce this momentum. We remain confident that our value discipline will continue to deliver strong risk-adjusted returns as inefficiencies arise - even in so-called efficient markets. Thank you for your continued support of Barrow Hanley and our Global Value Equity strategy.

¹ The Perpetual Global Share Fund- Class A has been operating since August 2014. Barrow Hanley, Mewhinney & Strauss, LLC commenced as Investment Manager of the Fund on 9 September 2020. Prior to this, the Investment Manager was Perpetual Investment Management Limited. The return shown for Class A in the Total Return table & the Growth of \$10,000 chart has been calculated using the performance of the A Class less the Management Fee and any historical Performance Fees, effective 1 October 2020 the performance fee of the Fund was removed.
